

# Series 2200 PRECISION, SOLID FLANGED REACTION TORQUEMETERS

- 10 ozf-in to 100,000 lbf-in capacities (0.07 to 11,300 N-m)
- 200% (2X) overload rating
- no bearings or speed limit
- short length with high stiffness
- 15-5PH stainless and aluminum alloy sensing elements
- mV/V or 0 to  $\pm 10$  Volt output
- NIST traceable\* bidirectional calibration
- low cost

\* To review our NVLAP Certificate of Accreditation and its Scope, see our website or follow the "Laboratory Accreditation" link at [www.nist.gov](http://www.nist.gov).

Series 2200 torquemeters are characterized by high accuracy, high torsional stiffness, and low torsional deflection. Their overload capacity is twice rated torque. They handle large extraneous loads with low crosstalk (1% typical). All models are calibrated CW and CCW to rated load in our NVLAP\* accredited laboratory, NVLAP Lab Code 200487-0. A NVLAP approved Calibration Certificate documenting NIST traceability is furnished.

Low capacity units have aluminum alloy torsion elements. Larger units employ 15-5PH elements; a high strength stainless steel with outstanding transducer properties. See Bulletins 770 and 7070 for a discussion of reaction torque measurement theory and extraneous load definitions.

Choose a mV/V or  $\pm 10V$  output. Suffix M denotes a mV/V output. A V Suffix denotes a  $\pm 10V$  output. V Suffix sensors have remote calibration. Specify the type by substituting an M or V for the underscore in the Model Number. Thus, a Model 2205V(1-5) is a 100,000 lbf-in  $\pm 10V$  output unit; the mV/V version is a Model 2205M(1-5), etc. See the overleaf for details.

#### Performance Specification Notes.

1. Except 10 ozf-in range; Model 2200M(1-1) is rated 1.3 mV/V (nominal).
2. Load Resistance  $\geq 10$  kOhm; Source Resistance  $< 1$  Ohm.
3. For Suffix M, Bandwidth is determined by external signal conditioner.
4. When powered by more than 20 Volts, maximum operating temperature is 160 °F. V Suffix Models have both reverse polarity and thermal protection.
5. For M Suffix, excitation is supplied by external signal conditioner. It should be regulated.
6. Specifications and dimensions are subject to change without notice.

## Performance Specification

<b>Bridge Impedance:</b> (Ohms, nominal)	350
<b>Output:</b> For M Suffix (mV/V, nominal)	$\pm 2^1$
For V Suffix (Volts)	$\pm 10.00^2$
<b>Zero Unbalance:</b> (% of Range)	$\leq \pm 1$ (M Suffix), $\leq \pm 0.1$ (V Suffix)
<b>Nonlinearity:</b> (% of Range, End Point Method)	$\leq \pm 0.1$
<b>Hysteresis:</b> (% of Range)	$\leq \pm 0.1$
<b>Nonrepeatability:</b> (% of Range)	$\leq \pm 0.05$
<b>Calibration Error:</b> (% of Range, @ 75 Degrees °F.)	$\leq \pm 0.05$
<b>Measurement Bandwidth<sup>3</sup>:</b>	
For M Suffix	External Conditioner Dependent
For V Suffix	dc to 500Hz
<b>Zero Drift:</b> For M Suffix	$\leq \pm 0.002$ (% of Range/°F)
For V Suffix	$\leq \pm 0.003$ (% of Range/°F)
<b>Span Drift:</b> For M Suffix	$\leq \pm 0.002$ (% of Reading/°F)
For V Suffix	$\leq \pm 0.003$ (% of Reading/°F)
<b>Compensated Temperature Range:</b>	+75 to +175 °F
<b>Usable Temperature Range:</b> For M Suffix	-65 to +225 °F
For V Suffix	-65 to +185 °F <sup>4</sup>
<b>Control Range:</b> For M Suffix	External Conditioner Dependent
For V Suffix	$\pm 10\%$ of Range for Zero & $\pm 5\%$ for Span
<b>Output Signal Polarity With CCW torque through torquemeter</b>	
For M Suffix	positive
For V Suffix	positive
Note:	output polarity changes with torque direction
<b>Overrange:</b> For M Suffix	External Conditioner Dependent
V Suffix Only	30% of Range, nominal
<b>Excitation:</b> For M Suffix (ac or dc)	15V, max <sup>5</sup>
For V Suffix	13.5 to 24V dc, unregulated @ 50mA, max <sup>4</sup>
<b>Power Supply Effect:</b> For M Suffix	External Conditioner Dependent
For V Suffix	$< 0.01\%$ of Range per Volt

**Order Number: 2204 V (1-4)**

Model No. \_\_\_\_\_  
Output Code (M = mV/V, V = ±10V) \_\_\_\_\_ Range (in lbf-in units)

The above Order Number example specifies a 10,000 lbf-in Solid Flanged Reaction Torquemeter with ±10 Volt output. A mV/V version of the same torquemeter is Model 2204M(1-4).
